# OVERVIEW

This goal of this report is to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

*The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal*

# CUTE HIPPO

## PROJECT DESCRIPTION:

### **According to their website:**

CuteHippo is a community-driven memecoin that's taking the crypto world by storm! Inspired by the playful, lovable nature of hippos, we're here to spread laughter, fun, and a sense of togetherness through the power of decentralized finance. CuteHippo is more than just a coin—it's a movement that brings people closer while building a strong and inclusive community.

**Release Date:** October 19, 2024

**Launchpad:** Pinksale

**Category:** Meme

## Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

### Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

# VULNERABILITY ANALYSIS

## NO ERRORS FOUND

# MANUAL CODE REVIEW

---

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time.

We categorize these vulnerabilities by 4 different threat levels.

## THREAT LEVELS

### High Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

### Medium Risk

---

Issues on this level are critical to the smart contract's performance, functionality and should be fixed before moving to a live environment.

### Low Risk

---

Issues on this level are minor details and warning that can remain unfixed.

### Informational

---

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

**Code Score: 95%**

# FOUND THREATS

## High Risk: 0

No high risk-level threats found in this contract.

## Medium Risk: 0

No medium risk-level threats found in this contract.

## Low Risk: 1

No low risk-level threats found in this contract.

# FOUND THREATS

## ⚠ Low Risk

Owner can set buy/sell fees up to 25%.

Combined buy+sell = 50%.

When fees are above 0, there will be certain amount of tokens that will be deducted from every transaction that users make.

Deducted amount will be as much as the fees % from total amount that user had bought, sold and/or transferred.

```
function setTokenRewardsFee(uint256 value) external onlyOwner {
    tokenRewardsFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setLiquidityFee(uint256 value) external onlyOwner {
    liquidityFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setMarketingFee(uint256 value) external onlyOwner {
    marketingFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}
```

# FOUND THREATS

## Informational: 2

Owner can exclude address from dividends.

```
function excludeFromDividends(address account) external onlyOwner {
    dividendTracker.excludeFromDividends(account);
}

function excludeFromDividends(address account) external onlyOwner {
    require(!excludedFromDividends[account]);
    excludedFromDividends[account] = true;

    _setBalance(account, 0);
    tokenHoldersMap.remove(account);

    emit ExcludeFromDividends(account);
}
```

Owner can set minimum CUTEHIPPO balance holdings required for holder to receive dividends.

```
function updateMinimumTokenBalanceForDividends(uint256 amount) external onlyOwner {
    dividendTracker.updateMinimumTokenBalanceForDividends(amount);
}

function updateMinimumTokenBalanceForDividends(uint256 amount) external onlyOwner {
    minimumTokenBalanceForDividends = amount;
}
```

# FOUND THREATS

## Informational: 2

Owner can change marketing wallet.

```
function setMarketingWallet(address payable wallet) external onlyOwner {
    require(
        wallet != address(0),
        "BABYTOKEN: The marketing wallet cannot be the value of zero"
    );
    require(!wallet.isContract(), "Marketing wallet cannot be a contract");
    _marketingWalletAddress = wallet;
}
```

Owner can exclude address from fees.

When address is excluded from fees, the user will receive the whole amount of the bought, sold and/or transferred tokens.

```
function excludeFromFees(address account) external onlyOwner {
    require(
        !_isExcludedFromFees[account],
        "BABYTOKEN: Account is already excluded"
    );
    _isExcludedFromFees[account] = true;

    emit ExcludeFromFees(account);
}

function excludeMultipleAccountsFromFees(
    address[] calldata accounts
) external onlyOwner {
    for (uint256 i = 0; i < accounts.length; i++) {
        _isExcludedFromFees[accounts[i]] = true;
    }

    emit ExcludeMultipleAccountsFromFees(accounts);
}
```

# Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.
